

Seleccionaremos el lenguaje, la zona horaria y teclado.

Pulsaremos Install NOW.

# WS 2016 PASO 4 Cargará el setup de instalación Setup is starting

Next

A continuación, nos pedirá la versión de Windows Server 2016 que queremos instalar. Por defecto nos pedirá instalar la versión server Core, sin entorno gráfico. Yo voy a instalar la versión con GUI, es decir, entorno gráfico y escritorio.

### **WS 2016**

### **WS 2016**

Empezará el proceso de instalación copiando los ficheros necesarios.

# Customize settings

Type a password for the built-in administrator account that you can use to sign in to this computer.

User name

Administrato

**Password** 

Reenter password

## **PASO 12**

Introduciremos el password de Administrador

P4\$\$w0rd

Finish
